## Expertise

Following advantages and main focuses in our business:

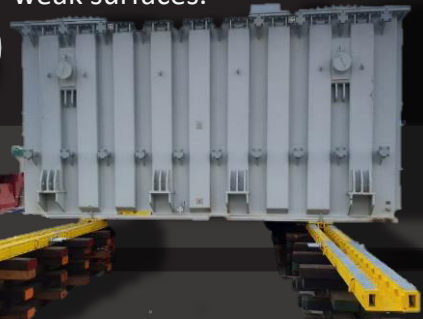

- We have implemented appropriated management systems
- The procedures are controlled and documented
- We have a business that is structurally well maintained
- Have defined basis for “continually improving”
- Every employee, on every level, has a Job Description and Performance Appraisals are done twice a year
- Taking these steps is not only necessary — it also serves to motivate, compensate, and reward staff members. Strong organizational management is particularly key to attracting and retaining good employees, who typically desire an objective and well-balanced performance evaluation system.
- Our Company is structured in a very flat hierarchy, managers are expected to not only monitor but also lead by example
- All of this amounts to our service offering meeting the client’s required needs with the least amount of hassles.

<i>Customer Relations &amp; New Business</i>	<i>Dual role ensures a smoother transition during on boarding, assist with Sales Queries and new business development</i>
<i>Customer Service Department</i>	<i>Sales Queries, Quote Requests – CSD Agents are dedicated to a base of clients that ensures a very high level of personalised services.</i>
<i>Operations &amp; Planning Department</i>	<i>Deals with on-site requirements, drivers and Site Inspections as well as vehicle route planning</i>
<i>Live Tracking and Monitoring (Cameras &amp; Telematics)</i>	<i>Vehicle track and trace capability. Live tracking and monitoring. Panic buttons in vehicles and armed response.</i>
<i>KPI management</i>	<i>Internal KPI’s are in place to measure performance and initiate action plans to address deviations.</i>
<i>SHE (safety, health &amp; environment) &amp; Risk</i>	<i>Dedicated to all SHE related aspects</i>
<i>POD &amp; Invoicing Department</i>	<i>Deals with POD tracking &amp; tracing, capturing &amp; POD related query resolution as well as Invoicing as per agreed procedure</i>
<i>Workshops</i>	<i>Dedicated to vehicle maintenance &amp; breakdown assistance.</i>
<i>Keyfleet Management Systems</i>	<i>Fuel management system as well as key repair and maintenance scheduler.</i>

# Jacobs Rigging

## 500 ton Track skid - AKA Jack and Slide. Various Applications

- a Safer alternative to overhead lifting or rollers.
- Makes rotating heavy loads accurate and efficient.
- Rig generators into power plants
- Slide vessels within refinery
- Move heavy equipment across weak surfaces.

Our Jack & Slide System is used to relocate items up to 500tons. It makes use of vertical hydraulic jacks and the turn table to move items such as heavy transformers into its final position. This system is ideal for use in areas with space and height limitations where vehicles can not access.

## Tippers

With our tipper division, we can transport Chrome, Manganese, Magnetite, Iron Ore, and Pig iron. Our Tipper fleet consists of side tipper links with the state-of-the-art lightweight design that are capable of super payloads up to 40 tons.

At Jacobs Transport we embrace technology and use it to our advantage. Each one of our drivers is equipped with a tablet, and a cell phone, we are in constant contact via WhatsApp and phone calls. We have ensured that our signing-on-glass technology is perfected and speeds up the receipt of POD's and therefore we can provide invoicing much sooner. Our drivers are tasked by our controllers directly onto their tablets and are able to follow the special instructions displayed as well as route guided to the correct locations.

**B-BBEE  
LEVEL 2**

In keeping with the advanced technology strategy, each one of our vehicles are fitted with 4 live cameras as well as Telematics tracking ensuring that our operators remain in 24/7 control of the fleet. We can provide our customers with secure, efficient logistics service. This has made us a valuable logistics service provider with a good name to large mines/contractors throughout South Africa.

# Jacobs Transport

**Jacobs** fleet of tippers are all recent models, mainly MAN and Scania, and we measure all variables that affect Cost Per kilometre (CPK). Tyres are regularly monitored and surveyed.

We have our own onsite workshop ensuring that the wheels keep rolling and we also have an inhouse bowser that assists us in keeping the diesel costs as low as possible ensuring more loads for less.

Our drivers are equipped with tablets that has Signing-On-Glass Technology in South-Africa as well as cross border ensuring that PODs get signed and digitally submitted instantaneously therefore speeding up the job to invoice process.

# Jacobs Transport Warehousing

Secure Indoor Storage for our clients industrial products, either Long term and/or Short term storage. Our warehousing facilities are equipped with two 10 ton overhead cranes.

- Enthusiasm
- Efficiency
- Accuracy
- Honesty
- Dependable
- Ownership
- Can-do-Attitude
- Integrity
- Hard Working
- End goal-Driven

## NEVER SAY NO

# **Jacobs Transport**

Founded in 1999 by two determined brothers, Gys and Jan Jacobs. They both saw the need in the market for a reliable specialized transport service. And so, Jacobs Transport was born. Starting with one second-hand crane truck the fleet has now grown to over 90 with 120 trailers. They ascribe their success and growth to the pursuit of their vision:

*To redefine the transport industry in southern Africa through servanthood*
